

# Frank Platt, CISSP

## Cyber Defense Strategist

### Enterprise – Cloud Security Architect

Frank Platt is a Cyber-Defense Strategist and Enterprise - Cloud Security Architect. He has provided risk and security consulting and educational services across the U.S. and around the globe for over 20 years.

Through his independent consultancy, InfoSec Alliance, LLC, he provides industry leaders with a more thorough understanding of risk, guidance of risk mitigation, and proven methods of improving the confidentiality, availability, and integrity of their security programs. InfoSec Alliance is an independent third-party consultancy with the willingness and ability to represent a client's risk and security requirements without bias toward any service provider, hardware or software vendor.

Frank's clients include industry leaders in fortune 100 companies and small and medium enterprises in the US and around the globe in the fields of finance and insurance, healthcare, transportation logistics, sports entertainment, real estate management, manufacturing, energy, and K12 and higher education.

Frank attended University of Memphis, is a graduate of the Kauffman Foundation Entrepreneurial Center, and is in good standing with the International Information Systems Security Certification Consortium, Inc. (ISC2) as a Certified Information Systems Security Professional CISSP (107408).

Frank has served on the Boards of Information Systems Audit and Control Association (ISACA) Mid-TN, Information Systems Security Association (ISSA) Mid-TN, InfraGard Mid-TN, and Association of Continuity Professionals (ACP) Mid-TN.
